

Workshop: Intertemporal Decision-Making

Universität
Konstanz

THURGAUER
WIRTSCHAFTSINSTITUT
an der Universität Konstanz

How do people decide between the present and the (near and far) future?

Our decisions today not only affect the present but also have consequences on the near and far future. Therefore, it is important to understand how people make these decisions between the short- and long-term. The aim of this workshop is to shed light on factors of intertemporal and intergenerational decision-making and identify possible interventions that could nudge the decision-makers to become more long-term oriented.
